

ViewModel

```
classDiagram
    class ViewModel
    class InformationViewModel["com.snail.userscreen.ui.information.InformationViewModel"]
    InformationViewModel --|> ViewModel
```

The diagram illustrates a generalization relationship in UML. A white box labeled 'ViewModel' is at the top. A blue arrow points upwards from a gray box labeled 'com.snail.userscreen.ui.information.InformationViewModel' to the 'ViewModel' box. The gray box contains the package path 'com.snail.userscreen.ui.information.' followed by the class name 'InformationViewModel' on two lines.

com.snail.userscreen.ui.information.
InformationViewModel
